DETAILED ACTION

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 30-31 are rejected under 35 U.S.C. 102(e) as being anticipated by the admitted Prior art of Figure 1.

Regarding claim 30, the admitted prior art of figure 1 teaches a router system comprising: a first virtual router (110) configured to operate as a backbone router [110]; and a second virtual router (120) configured to operate as a regional router [120].

Regarding claim 31, the admitted prior art of figure 1 teaches at least one resource [120] that is shared by the first virtual router [110] and the second virtual router [120].

***Allowable Subject Matter***

2. Claim 32 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 1, 4-14, 15-22, 23-24, 26, 27-29 are allowable

The following is a statement of reasons for the indication of allowable subject matter: As to claims 1,4-14, the prior art of record does not teach a resource allocator configured to control access to the at least one resource by the plurality of virtual routers. As to claims 15-22, the prior art of record does not teach creating a router profile for each of the plurality of virtual routers. As to claims 23-24,26, the prior art of record does not teach granting the request when the request is authentic and based on the priority information. As to claims 27-29, the prior art of record does not teach a resource allocator configured to receive a request for access to the at least one resource and grant access to the at least one resource to one of the plurality of virtual routers based on the security level and resource sharing priority associated with the one virtual router.

### ***Response to Arguments***

3. Applicant's arguments with respect to claims 1, 4-24, 26-32 have been considered but are moot in view of the new ground(s) of rejection.

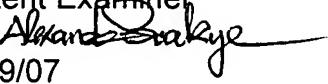

### **Conclusion**
